TUESDAY

will be clear later

(Fantastic, that even possible) This is

supposed, something different from the things supposed results of necessity because these things are so.

By 'because these things are so', I mean 'resulting through them', and by 'resulting through them' I mean 'needing no further term from outside in order for the necessity to come about.'

I call a deduction complete if it stands in need of nothing else besides the things taken in order for the necessity to be evident; I call it incomplete if it still needs either one or several additional things which are necessary because of the terms assumed, but yet were not taken by means of premises.

For one thing to be in another as a whole is the same as for one thing to be predicated of every one of another.

Note

"In another as a whole": This is his metaphysical or ontological phrasing. It means: 1) The whole nature or essence of the predicate is contained in the subject — not partially, not
