- His system: 1) Can't express multiple generalities (eg: "Every man loves some woman") 2) Doesn't handle relations (eg: "A is taller than B") 3) Doesn't incorporate modality well (though he tries in De Interpretatione)
- 4) Can't formalize hypotheticals or conditionals beyond a very basic form.

The improved systems came after thousands of years of struggle; and only because Aristotle gave us a foundation to stand on.

Q) What does "belonging not to some" mean?

There exists at least one thing (among the subject class) to which the predicate does not belong. (Particular negative proposition)

Ex: "Some animals are not tame"

Q) What does Aristotle mean by "Indeterminate" Here?

A premise or proposition that does not specify whether it is universal ("every") or particular ("some"), and therefore its
