24TH WEEK 24

APRIL 2024

Sun		7	14	21	28
Mon	1	8	15	22	29
Tue	2	9	16	23	30
Wed	3	10	17	24	
Thu	4	11	18	25	
Fri	5	12	19	26	
Sat	6	13	20	27	

MAY 2024

Sun		5	12	19	26
Mon		6	13	20	27
Tue		7	14	21	28
Wed	1	8	15	22	29
Thu	2	9	16	23	30
Fri	3	10	17	24	31
Sat	4	11	18	25	

- 'B belongs not to every A' is a particular for Aristotle

08.00

because: 1) It does not affirm that the predicate holds in all cases. 2) Nor does it deny it holds in all cases. 3) It only denies universality.

- This leaves open the possibility that the predicate belongs to:
☐ 12 Some / None / Many but not all

- When someone says, "B belongs not to every A," they are not affirming "B belongs to no A". They are only withholding

the claim that "B belongs to every A."

- So, it's a weaker logical commitment, and therefore treated as a particular. (Particular negation)

- The fact that "not every" could hide a universal negative

is true — but Aristotle is working at the level of what is said, not yet what is factually the case. If you want to say none, then say it directly, says Aristotle.

WHY?
